Subject: Amendment to Cleanup Endpoint
[removed.txt](#)
[FINAL-SignedCopy_Amended_Phase II-CleanupEndpoints.pdf](#)

Gang

I had to provide an Amendment to the Cleanup Endpoint Document to clarify language.

At issue was:

1. The CAT – the focus was to have the team focus on cliff faces because of the challenges of cleaning that shoreline type
2. Endpoint – We modified the language regarding stain vs coat because as it stood the endpoint would never have been achieved

I received a question regarding the CAT that if one member of the team votes “No” does that mean one team member can make the final decision for natural attenuation? Answer is, no.

That is why we have a team of disciplines involved in this exercise. The disciplines involved include safety, environmental, cultural (including tribal), geological, and operations. Each cliff bluff location is reviewed and a discussion occurs. Also remember that they can only consider clean up alternatives in Attachment 3 (sandstone cliff face) of the Cleanup Endpoint document.

Thanks

Randy Imai
